

# Unparalleled innovation requires unparalleled talent

Perspecta Labs, the innovation hub of Perspecta, is celebrated for its hundreds of patents, generation-after-next-thinking and cutting-edge technology. We have a culture of collaboration and teamwork built on deep expertise, industry leadership, enthusiastic and knowledgeable colleagues and a rich network of university relationships. Perspecta Labs helps differentiate Perspecta from its competitors, and working here differentiates you from your peers.

## What we do

We create new technologies. We advance and harden emerging capabilities. We develop and deliver innovative solutions that work at scale and in complex, real-world environments—making an impact in defense, communications, energy, transportation, finance and health care.

## Our capabilities include:

- Cybersecurity and network defense
- Critical infrastructure protection
- Mobility and tactical communications
- Sensor networks and autonomy
- AI and machine learning
- Smart grids and Internet of Things
- Optical and quantum technologies
- Electronic warfare
- Spectrum management

## Work locations include:

- Basking Ridge, NJ
- Red Bank, NJ
- Silver Spring, MD
- College Park, MD

## What we're looking for

Perspecta Labs delivers the visionary thinking that has consistently solved the most perplexing communications and information challenges.

We're looking for people who are passionate about new ideas, who can think critically and iterate quickly.

## Experience we're looking for includes:

- Cybersecurity
- Advanced networking
- Big data analytics
- Wireless communications
- Artificial intelligence and machine learning
- Software development
- Distributed systems
- Signal processing
- Modeling and simulation
- Rapid prototyping

## Launch your new career

Without a doubt, it's our people that make the difference. That's why, along with helping customers achieve mission success, our people are our top priority. We are committed to providing employees with professional challenges and opportunities to propel their careers in a collaborative and innovative work environment.

## Grow your career with:

- On-the-job and classroom training in emerging technologies
- Seminars and lunch-and-learn sessions highlighting new research
- Mentoring program for new employees
- Technical, certification, supervisory, business and leadership courses
- Courses any time, any place online
- Reimbursement program for select industry certifications

## Be a part of something bigger
